

## FAQs

### Will camp be fully outdoors?

Yes, with the exception of restrooms and short breaks, camp will be held outdoors.

### Will the girls be screened when coming to camp?

We will have daily screenings with temperature checks for each camper and staff member. Any girl displaying a fever of 100.4 or higher will not be allowed into camp.

### What about cleaning/sanitation?

We have a full-time janitor on staff who is hired primarily to sanitize the restrooms after each use, to make sure the environment in camp is as safe as possible.

### How will the girls stay cool?

Being that we will have tents set up for shade, tons and tons of water all day, and an alternative option to swimming, the real question is how to get them to leave camp at the end of the day to return to their air-conditioned houses!

### What kind of activities do you have planned for this summer?

This summer will not be that different from previous summers in that regard. Activities will go on as usual, with action packed fun filled days, where we will keep the girls happy and smiling from the minute they wake up till the minute they go to sleep. We cannot take responsibility for what those times will be though!

### What is the plan for rain?

In the event of passing showers or light mist/drizzle, camp will continue - the girls do not melt 😊

In the event of prolonged inclement weather which will hinder the operation of a full day of camp, we reserve the right to temporarily close for the day. If we close for more than 3 days over the duration of Camp, we will extend the season past August 14th for each additional day :)

### Are campers and staff required to wear masks?

As per NJDOH guidelines, mask need to be worn when distancing **outside** of their group is not feasible. The exception for this is extreme heat, as they are understanding that children may find this challenging.

### Will there be water activities, as I see the Health Department did not approve the construction of the best pool in the world this summer?

YES! We will have alternatives to swimming to keep the girls cool and hydrated. Unfortunately, not all of them will keep the girls dry.
